

Fence Mesh Grades

Max is your go-to product for quality images. It's close weave gives you maximum privacy and a bigger surface area for lots of ink – more detail and brighter colours. It's super strong and can be used in windy locations so long as your fence is solid as a rock!

Sizes available

1.8m or 1.6m high x 50m length rolls.
Or custom cut to panel widths.

Lite is the mainstay and most popular mesh for everyday use. You'll get pretty good privacy and a fair amount of wind can pass through. You won't get fine detail, but the image quality is on the money and colours retain their vibrancy.

Sizes available

1.75m, 1.6m or 830mm high x 50m length rolls.
Or custom cut to panel widths.

Custom Sizes

Custom sizes can be achieved from rolls up to whopping 5m high. The grades of mesh vary depending on stock levels available at the time. Enquire with us if you have a project that requires specific mesh banner sizes.

NZ's leading fence wrap printer.
